

# Specification Sheet: Heavy Duty Plastic Locker Range

Our most heavy duty locker option, these high quality plastic lockers are built to withstand heavy daily use. They are tested to withstand 1000kg of force to the entire locker system and the HDPE material is unlikely to dent or chip like metal or wood. They are water and UV resistant, vandal proof, and easy to clean.

They are a fully modular system, allowing different combinations of doors and colours to be joined to suit your needs.

Stands and benches are available to suit.
